

Excel VBA transaction tool

visual instructions

STEP 1

Import transactions

Paste your transactions into the green highlighted columns: Date, Description, Amount.

STEP 2

Select country

Choose the country from the dropdown menu. The country is where the transactions were made.

STEP 3

Generate output

Click either button — both can be run separately:

- Detailed list — date, merchant, category, amount
- Merchant summary — merchant, category

STEP 4

View results

Find the CSV file on your Desktop, and see the same output on the last tab, Cleaned_Transactions.
